Bear Construction Co. – Headquarters Office  
Rolling Meadows, IL

### **About Bear Construction**

Experts in sustainable building construction and maintenance.

Bear Construction Company was started in 1984 by Nick, George and Jim Wienold. The company quickly grew from a commercial carpentry contractor into a commercial general contractor with a focus on tenant (build outs / interior alterations), medical, commercial and industrial buildings, and telecommunications / technology facilities. Over the next twenty-five years, the company expanded its expertise to include municipal and government facilities. We are known as a service-oriented company that provides fast response to a variety of construction requirements.

The owners of the company are:

**Nicholas Wienold**, President and Owner  
**George H. Wienold**, CEO and Owner  
**James S. Wienold**, Executive VP and Owner

**Types of Services.** We provide the following types of facilities maintenance services:

- Emergency Repairs
- Minor Building Repairs
- Painting
- Electrical Repair
- Metal Railing and Fence Repairs
- Door and Frame Repairs
- Programmed Repairs
- Locksmith Services
- Preventative Maintenance
- Roofing Repair
- Façade Restorations

**Memberships.** We are proud to be members of the following organizations:

- Healthcare Engineering Society of Northern Illinois (HESNI)
- U.S. Green Building Council (USGBC)
- Illinois Chamber of Commerce
- Affiliate Member of Building Owners and Managers Association (BOMA) Chicago
- Hispanic American Construction Industry Association (HACIA)
- American Society of Healthcare Engineers (ASHE)

Based on our membership in the above organizations, Bear Construction Co. receives ongoing industry training and education regarding new building techniques, new building products, green building technology, etc. In addition, we maintain a staff of OSHA-certified safety compliant tradesmen. Many of our key project managers are LEED AP certified.

**Commercial Clients**

**Reasons Clients Hire Us:**

- **Experience.** Our senior staff each has an average of 30 years of construction industry experience.
- **Value Engineering.** We can suggest alternative materials, construction methods, and/or designs that can meet budget targets without sacrificing quality or functionality
- **Green.** We are a leader in sustainable building construction and maintenance. We use environmentally-friendly building techniques that can contribute to LEED certification.
- **Technology.** We have knowledge of the newest materials and latest techniques in creative finishes. This allows us to build a dazzling space with a unique look.
- **Limit Tenant Disruptions.** We use special techniques that limit to disruptions to building tenants, e.g., hospitals and commercial offices to minimize dust, water, vibration, noise, etc. These minimize disruptions and help prevent the potential spread of diseases.
- **Capacity.** We can handle complex construction projects up to \$10 million.
- **Supplier Diversity.** We work closely with small, minority (MBE), woman (WBE), 8(a), SDB, HUBZone, Service Disabled Veteran, and Disadvantaged Business Enterprise (DBE) firms as our subcontractors. We are mentor-protégés with an 8(a) firm and a SDVOSB firm.
- **Safety.** We have a superior safety record that is managed by a full-time safety director.
- **Performance.** We have successfully performed over 10,000 projects in the last 25 years. We perform approximately 1,000 projects per year.
- **Special Knowledge.** We know how to coordinate and schedule our work with government officials.
- **Specialized Equipment.** We know how to handle specialized hospital equipment, including fire-rated systems, medical gas, air monitoring, filtration, and electrical systems.
- **Environmental Training.** A large number of our field and office personnel are Network Awareness Trained (NAT), OSHA certified, Level I and Level III Asbestos Education, and

Excavation Competence Personnel Training. Our personnel are re—certified annually and keep up-to-date by attending ongoing training seminars.

## Quality Control

### **Internal review procedures which facilitate high quality standards in the organization**

Bear Construction uses the following quality-based approach for all our projects:

- Accurately determine the exact needs of the project
- Create the safest, most-efficient methods to complete the project
- Develop a phased and detailed work plan
  - Automated software tools, e.g., MS Project
  - Project budget
  - Master Schedule / Project Checklists
  - Personnel Assignments
  - Bill of Materials
- Coordinate with other contractors and building operators to minimize disruptions
- Negotiate the best price for all labor, materials, rentals and other items
- Used pre-qualified subcontractors for all work not done by us
- Create realistic project schedules with frequent periodic updates
- Exceed our client's expectations

### **Individuals who supervise or review projects specifically regarding quality control**

Bret Bush, Vice President is the overall Quality Control manager for Bear Construction.

Quality Control Managers are assigned on project-by-project basis.

In addition, field supervisors also provide quality control on an individual project basis.

### **Subcontractor quality control measures**

All subcontractors are required to attend our quality control and safety meetings, along with submitting their progress documents on a daily or weekly basis.

### **How we handle potential problem areas and solutions**

Based on 25 years and over 25,000 projects successfully completed, we are proactive in identifying potential problem areas.

We hire Union-certified workers who are the best trained and most experienced. They help us avoid problems. If encountered, they are able to quickly resolve problems.

We use MS Project software to help us identify the critical path for our projects. This helps ensure we focus critical resources to meet all critical path requirements. This allows us to maintain cost and schedule estimates.
